

Our mission at LORENTZ is to enhance lives! LORENTZ is the world's leading company in the production and distribution of solar-powered water pumps. By using solar energy, our pumps supply people, animals and plants in more than 130 countries worldwide with water every day.

In order to keep up with our steady growth and to strengthen our team, we are looking for a motivated candidate to support our users.

Android Software Developer (m/f/d)

Your profile

- Degree in Computer Science or a comparable qualification/ experience
- Experience with object-oriented development of Android applications in Java and preferably also in Kotlin
- Experience with Android SDK and handling of web services, XML, JSON, REST and Google Play Store with release management
- You like to work with up-to-date libraries like retrofit, okhttp, koin, rxjava, androidx, room, zxing
- Experience in architecture components and MVVM is a benefit
- You are motivated, creative and open to new topics
- You have an analytical mind-set, conceptual thinking, fast perception and think "outside the box"
- You like to work responsibly and independently but also as part of the team

Your tasks with us

- Developing native Android apps as customer interface to our pump systems via Bluetooth Classic, Bluetooth Low Energy and NFC
- Programming structured UIs with Material Design and a focus on user experience
- Using your Know-How to improve and maintain our existing apps
- Participating in developing the app architectures for clean and maintainable code
- Collaborating with product owners to improve existing apps and to design the apps of tomorrow
- Adding your experience to an agile and international team that is dedicated to deploying new features fast

What we offer

Flexible working hours / places
(opportunity to work in our office in
Hamburg or home office)

Benefit from a good and performance-
related remuneration including a
company pension scheme

Further development through
