LORENTZ PumpScanner
Android™ app for system configuration and data analysis

LORENTZ PumpScanner app for Android™ devices is the tool to allow installers, service staff and customers to configure, operate and interrogate LORENTZ pump systems.

All LORENTZ pump systems* have in built data logging. The PS DataModule collects performance data from the pump system and stores it for periodic collection.

The PS DataModule uses Bluetooth™ to communicate with the LORENTZ PumpScanner Android™ App allowing secure real time data to be viewed and historic data to be collected without physical connections.

The PS DataModule can be specified on any PS pump systems and is embedded in the pump controller. The PumpScanner App service version is free to use for approved LORENTZ Partners. A one off lifetime fee is payable to activate the data logging services, activation can be made at any time.

The PS DataModule opens up a new world of information rich services previously unavailable at such an accessible price point.

Features
- Provides real-time and stored data for:
  - voltages
  - currents
  - input and output power
  - flow rates
  - operating time
  - head
  - pump speed
  - cable losses
  - temperature, and more
- Bluetooth™ connectivity for secure contactless data transfer
- Stores up to 10 years of data (at 10 minute frequency)
- Two-way communication to control and program pump speeds and operating times
- Connections for additional external sensors (flow and pressure)
- LORENTZ PumpScanner for Android™ App for viewing performance data
- PumpScanner is available in Customer and Service Engineer versions

Benefits
- Provides clear pump and water source performance information for monitoring and future planning
- Very professional diagnostic and information tools available on low cost Android™ smart phones
- Reduces fault finding time and cost
- Identifies any pro-active service work that needs to be carried out

The PS DataModule uses Bluetooth™ to communicate with the LORENTZ PumpScanner Android™ App allowing secure real time data to be viewed and historic data to be collected without physical connections.

The PS DataModule can be specified on any PS pump systems and is embedded in the pump controller. The PumpScanner App service version is free to use for approved LORENTZ Partners. A one off lifetime fee is payable to activate the data logging services, activation can be made at any time.

The PS DataModule opens up a new world of information rich services previously unavailable at such an accessible price point.

* - PumpScanner is compatible with all current PS2 and PSk2 systems. PS systems (pre-1993) may not be compatible.
